

A Guided Tour of Veterinary Anatomy: Domestic Ungulates and Laboratory Mammals, 1e

This excellent, user-friendly reference provides the reader with a guided tour of the dissection and comparative anatomic study of laboratory mammals, as well as the horse, ox, goat, sheep, and pig. Emphasizes applied anatomy as it relates to physiology, pathology, radiology, medicine, and surgery. Also includes detailed reference information on the radiographic anatomy of the equine and bovine tarsus, carpus, metacarpophalangeal joint, and digit.
