

Chaos, Complexity and Transport - Proceedings of the CCT 11

The main goal is to offer readers a panorama of recent progress in nonlinear physics, complexity and transport with attractive chapters readable by a broad audience. It allows readers to gain an insight into these active fields of research and notably promotes the interdisciplinary studies from mathematics to experimental physics. To reach this aim, the book collects a selection of contributions to the CCT11 conference (Marseille, 23 - 27 May 2011). Readership: Undergraduate, graduate students and researchers in nonlinear science, statistical and plasma physics.
