

# Disaster Nursing and Emergency Preparedness for Chemical, Biological, and Radiological Terrorism and Other Hazards

This comprehensive textbook is designed to prepare any nurse to provide health care under disaster conditions. The content ranges from general principles of disaster preparation and management to management of specific types of disasters. Natural and environmental disasters are amply discussed. However, the special emphasis of the book is response to disasters caused by biological, chemical, and radiological agents. Vital information on post-disaster restoration of basic public health, psychological effects, and establishing communication is provided. Each chapter is prefaced with Key Messages and Learning Objectives, and followed by Study Questions and Internet Activities. Numerous case studies bring the reader into contact with professionals from organizations crucial to the U.S. disaster response. The Appendix includes an extensive listing of Internet resources.
